Drumset Instruments

Across

1. a cymbal used for accenting, producing a loud, crashing sound.
8. a larger tom-tom that stands on the floor, producing a deeper sound.
9. the central drum that produces a sharp, staccato sound, played with drumsticks.
10. a larger cymbal used for steady rhythms, producing a clear, sustained sound.

Down

2. a cymbal with a unique, trashy sound, often used for special effects.
3. a small cymbal used for quick accents, producing a short, splashy sound.
4. a metal percussion instrument producing a distinct, clanging sound.
5. a pair of cymbals mounted on a stand, played with a foot pedal and drumsticks.
6. the large drum that produces the low booming sound, played with a foot pedal.
7. a cylindrical drum that produces a resonant sound, used in various sizes.
